

Innovation in Academia

A faculty transformation lab for stronger research questions, defensible contribution, patent potential and fundable partnerships.

Faculty, HoDs, Deans, Research Supervisors and Innovation Cells

Dr Amar Banerjee

Innovation Leader • Researcher • Facilitator

Move beyond the next paper towards research that matters

Participants work on real research and institutional challenges, test novelty and non-obviousness, and leave with a practical pathway towards experiments, IP, partnerships and funding.

WHY THIS MATTERS

Publication activity does not automatically create distinctive research or institutional value.

Research agendas can become incremental when problem discovery, beneficiary value, novelty, evidence, IP decisions and external partnerships are treated as separate activities.

THE SHIFT

From routine extensions to consequential, defensible contribution.

Faculty learn to identify underexplored problems, frame a meaningful contribution and connect research with patents, partners and funding routes.

WHAT LEADERSHIP SEES

A visible portfolio of research problems, novelty lenses, experiment priorities, IP opportunities and possible external partners.

VISIBLE OUTCOMES

01

Mapped portfolio of consequential research problems

02

Novelty and non-obviousness canvas

03

Patent, publication and partnership decision lens

04

30-day experiment and engagement roadmap

A one-day applied faculty lab

One day | 09:30-17:00

The program combines problem discovery, research storytelling, inventive thinking, TRIZ, reverse brainstorming, IP awareness and action planning.
Dr Amar Banerjee • Innovation Leader • Researcher • Facilitator

A structured path from insight to action.

Each stage converts an abstract innovation concept into a visible faculty-owned research output.

01

Beyond the next paper

Recognise the incremental publication trap and define meaningful contribution.

02

Discover problems worth solving

Scan tensions, unmet needs, stakeholders and emerging opportunities.

03

Build a relevance story

Connect evidence, beneficiaries, urgency and institutional value.

04

Invent around contradictions

Use TRIZ patterns and cross-domain analogies to generate differentiated concepts.

05

Test novelty and IP potential

Use reverse brainstorming, non-obviousness and defensibility lenses.

06

Map the impact pathway

Define experiments, patents, partners, funding routes and next owners.

INCLUDED

**Practical tools,
not passive at-
tendance.**

Faculty workbook, research problem landscape, novelty and non-obviousness canvas, TRIZ tool cards, publication-to-patent lens, partnership and funding canvas, action roadmap and participation certificate.

WHO SHOULD PARTICIPATE

University and college teachers, heads of department, deans, research supervisors, lab leaders, doctoral mentors, curriculum teams and institutional innovation cells.

Research depth, leadership context and practical facilitation.

Dr Amar Banerjee

INNOVATION LEADER • RESEARCHER • FACILITATOR

An innovation leader, researcher, inventor and facilitator with more than twelve years across AI, R&D, healthcare, industrial systems, digital twins, applied research and capability building.

WHY THIS FACILITATION MODEL WORKS

- Context is shaped around a real institutional or organisational challenge.
- Participants create visible outputs and decisions during the engagement.
- Complex innovation ideas are translated into practical, usable tools.
- Every program ends with a continuation path, owners and next steps.

ENGAGEMENT PATHWAY

01

Clarify the priority

Audience, context, evidence, constraints and desired outcome.

02

Shape the experience

Select the right modules, format, examples and participant outputs.

03

Facilitate and continue

Produce action-ready work and a 30, 60 or 90-day path.

START WITH ONE REAL CHALLENGE

Shape a faculty cohort around one institutional research and innovation priority.

The first conversation focuses on whether there is a credible path to value. Scope and investment follow the agreed outcome.
